Home Front Command

National Emergency Authority – NEA

Nationwide Home Front Drill

Practice Siren

On Tuesday, June 2, 2009, at 11:00 a.m.,
a practice siren will be sounded throughout Israel
as part of the national home front drill "Turning Point" 3
The drill will be managed by the National Emergency Authority – NEA (Rachel)
with the participation of all ministries and organizations involved in the home front's organization and preparedness for emergencies

- Upon hearing the siren, all the country's residents are requested to enter a protected space chosen in advance according to the instructions of the Home Front Command.
- Entering protected spaces is to be done everywhere – at home and at both private and public workplaces.
- In the event that entering a protected space during the drill involves an unreasonable disruption to your routine, you may continue with your regular activity. In any case, the location of the protected space must be known and clearly marked.
- Vehicular traffic, including public transportation and private cars, will continue as usual even during the sounding of the siren.
  - The siren is being activated to practice entering the protected space, to check the space, and to make sure the siren system is working properly and heard properly.
  - The goal of entering the protected spaces is to check and become familiar with the protected space, and ensure that it has been prepared according to the instructions of the Home Front Command.
  - In addition to the nationwide practice siren that will be sounded at 11:00 a.m. on June 2, other sirens will be sounded throughout the week in various parts of the country. Detailed announcements will be made through the media

In the event of a real emergency, a rising and falling siren will also be activated, along with broadcasts and instructions through the media.

For subjects related to shared and public shelters, contact the municipal information centers.

For anything related to difficulties and problems in hearing the siren and for further information, contact the Home Front Command information center:
